ECMAScript (ES) is a scripting language specification standardized by ECMAScript International. It is used by applications to enable client-side scripting. Languages like JavaScript, Jscript and ActionScript are governed by this specification. This tutorial introduces you to ES6 implementation in JavaScript.

Audience

This tutorial has been prepared for JavaScript developers who are keen on knowing the difference between ECMAScript 5 and ECMAScript 6. It is useful for those who want to learn the latest developments in the language and implement the same in JavaScript.

Prerequisites

You need to have a basic understanding of JavaScript to make the most of this tutorial.
